MENS RUNNING / HOLIDAY 2017

ENGINEERED FIT. FLUID TRANSITION.

Men's Nike LunarGlide 8 Running Shoe features plush Lunarlon foam that cushions your stride and articulated laser cuts in the midsole for a smooth ride.

Flywire cables lock down the midfoot.

Lunarlon foam offers ultra-plush, responsive cushioning.

Laser cuts throughout provide a smooth transition.

400

Offset: 9.5mm
(27.5mm heel, 18mm forefoot)
Last: E-16

FEATURES AND BENEFITS

UPPER

- 1 Single-layer engineered mesh throughout the upper provides ventilation and support where you need it most.
- 2 Partial bootie construction wraps the foot to enhance breathability and provide a sock-like fit.
- 3 Flywire technology is ultra-lightweight, customizable through the laces and wraps the midfoot and arch for a dynamic fit.
- 4 Collar is lined with a lightweight foam layer for a plush feel.
- 5 Internal heel counter and skin-like overlay in the heel provides structure.

MIDSOLE

- 6 Lunarlon foam midsole uses a softer injected Phylon (IP) core foam that is directly underfoot and a slightly firmer injected unit sole (IU) carrier foam to deliver a super plush ride.
- 7 Dynamic Support platform provides comfortable stability without the added weight or stiffness of a traditional medial post.
- 8 Articulated laser cuts on the medial and lateral sides of the midsole provide a smooth transition from heel to toe.

OUTSOLE

- 9 Molded pods offer multi-surface traction. Pods deflect in at impact then spring back creating a piston effect that delivers responsive cushioning.
- 10 Laser-cut forefoot enhances transition through footstrike. Cuts are 6mm deep for flexibility.
- 11 Laser cuts in the heel dampen impact for a soft, smooth crash phase.
