COOL COVERAGE.

Women's Nike Pro Hypercool Top pairs a form-fitting design with strategically placed mesh to help keep you cool during the heat of performance.

Nike Hypercool technology combines targeted ventilation with sweat-wicking fabric.

Engineered mesh on the chest helps keep you cool.

Body-skimming design is cut close to the body.

FEATURES AND BENEFITS

FABRIC

- 1 Nike Pro Hypercool technology throughout combines targeted ventilation with lightweight, sweat-wicking fabric to help you maintain optimal performance as conditions heat up. The fabric is made with ShinCool® yarns that feel cool on your skin.
- 2 Front Body Panel: Jersey fabric provides a soft feel while the spandex in the fabric adds stretch for mobility.
- 3 Front Yoke and Back Body: Knit jacquard construction creates engineered open-hole mesh patterns that help ventilate these high-heat zones.

DESIGN

- 4 Crew neck provides a comfortable fit.
- 5 3/4-length sleeves hit at your elbow to provide coverage without limiting mobility.
- 6 Fitted design is cut close to the body and can be layered or worn on its own.
- 7 Flat seams feel smooth against your skin.
- 8 Inset sleeves with underarm gussets allow for a comfortable range of motion.
- 9 Shirttail hem lends a flattering fit.
- 10 Large "NIKE" is engineered into the back panel.
- 11 Swoosh design trademark is screen printed on the left hem.
